

Overview

Dedicated High-Speed Access

RCN Metro's Internet Service offers a high-speed, dedicated access solution that gets your business connected on-line efficiently and affordably. If your business requires first class Internet access and DNS with low latency and high reliability then RCN Metro's Internet Service is the answer. It's powered by multiple Tier 1 peering points, monitored by dual Network Operations Centers, and backed by dedicated customer support. RCN Metro's Internet Service scales from 1Mb speeds up to full-rate GigE rates to support varying business needs. In addition, managed router service and BGP are available as added services.

Robust service level agreements (SLAs), backed up by a diverse fiber network, and multiple network operations centers (NOC's) provide necessary availability and reliability. As with all RCN Metro's services, dedicated Internet access is backed with 24x7 service and support.

Business Drivers

Today's enterprise is dependent on Internet access for some of its most basic and critical functions, including:

- Data backup and storage
- High-capacity e-mail traffic
- Access to hosted business-critical applications
- Support for employee web access
- Remote access for deployed workers
- Large file transfers
- Web hosting

RCN Metro's dedicated Internet Service provides a reliable, high availability solution to support these crucial business applications. Supported by RCN Metro's diverse fiber network, RCN supplies Internet access that your business can rely upon as a primary or backup solution.

Benefits

- Cost-effective incremental bandwidth; pay for only the access your business needs
- Availability ensured by a network diverse from other providers, particularly helpful when sourcing as backup Internet access
- Reliability from multiple Tier 1 peering points and 24 x7 monitoring
- A menu of optional features, such as BGP routing, to customize the service to your business needs

Additional Services

Ethernet
